Fortune Trade LLC is the official distributor and supplier of several brands of lubricants, filters and coolants in Azerbaijan. We are always at your service with our high quality and wide range of products. With many years of experience and specialized staff, we meet the needs of our customers for lubricants, filters and coolants!

Our customers – **Car shops, car repair shops, trade networks, metallurgy, mechanical engineering, metal processing, mining, construction, pulp and paper, energy, wood processing, food industry, etc.** are enterprises operating in the fields.

As a supplier of oil and filters with a constant supply of finished products, we have a wide range of lubricants and filters in stock. We have our own transport fleet, which significantly simplifies delivery, as well as allows customers to pick up the ordered product directly from the warehouse.

At our disposal is a staff of experienced sales and technical support specialists, specially trained in accordance with strict standards in the field of product knowledge and customer service. Our experts help to solve problems and offer ideas on many issues related to lubricants for various purposes.

AVISTA

Advanced lubricants made in Germany.

We are behind the Avista brand!

The Avista brand is part of Avista Oil, a sustainable business model. Oil production is a pillar within this business model and in all value chains of Avista Oil. Avista lubricants have been produced in Dollbergen since its inception.

It has come a long way since our AVISTA product range for lubricants was launched. In 2019, we combined our decades of experience and efforts in product development, sales and marketing and launched the new AVISTA brand. Our goal: to provide each customer with a perfect product - technically high quality and therefore a reasonable price.

The Avista brand offers you engine oils, industrial oils, transmission and hydraulic oils. High-quality products with perfect production technology ensure that your equipment, engine will last a long time and be in perfect condition as on the first day.

High quality oils from Germany

Our products are designed to perform perfectly over long distances, in intensive working conditions, in dusty and wet conditions!

FIL FILTER

TÜRKİYE'NİN İLK VE EN BÜYÜK FİLTRE FABRİKASI

Founded in Iskenderun in 1966, Fil Filter is the largest filter factory in Turkey and, with its young dynamic and progressive personality, is the future of Turkey. Filter Filter T.S.E. became the first company in Turkey to receive the "Original Equivalent Piece" document!

We are always with you when you need oil, fuel, air, cabin and other types of filters!

Quality Certificates

References

As a filter manufacturer, Fil Filter Factory produces original filters for the above-mentioned brands and offers filters of the same quality and equivalent to the market in accordance with the state-approved "Original Equivalent Fabric" document!

HEAVY VEHICLES CHAMPION!

LET'S GET TOGETHER WITH THE CHAMPIONS OF LONG
ROADS AND HEAVY VEHICLES FOR 35 YEARS

Macit & Macit Ltd. It was established in 1998 to create a strong supply infrastructure in the automotive and other industries. With the expansion of the service range, it has become a market leader in terms of customer potential for 2 years.

Macit & Macit Ltd provides the production and supply of products, intermediates and raw materials required for the quality and efficient operation of enterprises and organizations of various scales.

inci[®] plus ANTIFRIZ

It is a mixture of water and ethylene glycol that prevents the liquid in the radiators from freezing on cold days and boiling on hot days. This substance reduces the freezing point of the liquid in the radiators and increases the boiling point. The degree of freezing of antifreeze used in cars should be determined by the climatic zones of the region where the car is located. Therefore, antifreeze must be added to the machines by adding water according to the freezing plate written on the product packaging. To do this, the use of antifreeze must be correct. Organic Ethylene Glycol-based antifreezes are more durable than inorganic ones. However, it is more expensive due to inorganic antifreeze due to high production costs.

Our customers:

We have been supplying oil and filters to many companies in the market for many years. In addition to the above, unregistered companies are also included in our customer portfolio.

We are the official distributor of all the brands you see on the previous pages in Azerbaijan. We guarantee the authenticity of our products.
